

Busy Season

JANUARY AND FEBRUARY represent the busy season for many actuaries, and the 48 letters on the outer circle of the diagram, reading clockwise from the top, will yield a seasonal message. The 12 letters on the middle ring, reading counterclockwise from the bottom, will help explain why some actuaries are so busy.

The clues below all lead to five-letter answers, which must then must be scrambled and entered into the diagram. Adjacent entries (e.g., 1 and 2, 3 and 4, 5 and 6, etc.) have four letters in common. Each quartet of answers (1-4, 5-8, etc.) shares three letters, each octet (1-8, 9-16, etc.) shares two letters, and each group of 16 (1-16, 17-32, 33-48) shares one letter. The three groups of 16 commonalities fill the center ring, the six octet commonalities fill the next ring, and so on, with the outer ring filled by the non-common letters of adjacent entries.

There are five proper nouns among the answers. The remaining answers are common English words, except 32 and 34, which are somewhat uncommon.

The clues are all cryptic clues. This means that one end is a fairly straightforward definition of the answer, while the other is an alternative, often mechanical, way of getting to the same word. In this puzzle, the mechanical means I use include puns, homophones, anagrams, constructions, and double definitions. (For a further explanation of cryptic clues, e-mail me at Thomas.Toce@ey.com.) Ignore punctuation, which is intended to mislead. In order to make the solver list, your solutions must be received by Jan. 31, 2009.
