## Guest Puzzle #66 – July 2017 "Indeterminacy" (by Arthur Schless)

**Instructions:** Guess the words defined by the cryptic clues (answers vary in length from three to eleven letters, eight are capitalized, and one consists of two words) then enter them in the grid one after another in the same order as their clues, starting in the upper left corner. Across words that don't end at the right continue on the next row, and down words that don't end at the bottom continue in the next column. Eight across words and eight down words won't fit in the grid unless one of their letters is omitted. Those sixteen letters, taken in order as they occur in across and down words spell two words related to the mystery entries. Thanks to John for his puzzle wizardry.
