

Harvard Puzzle "Bookmark"

Instructions: Guess the words defined by the cryptic clues (words vary in length from four to nine letters, and three are capitalized), then enter them in the grid one after another in the same order as their clues, starting in the upper left corner but skipping the central section marked by heavy borders, which words may straddle. Across words that don't end at the right continue on the next row, and down words that don't end at the bottom continue in the next column. Five down words won't fit in the grid unless one of their letters is removed. Those five letters (which are related to the two *mystery entries*), taken in order, are to be entered in the central section. (Thanks to Kevin Wald '93 for test-solving and editing this puzzle.)
