## Harvard Puzzle "Crimson in Triumph"

**Instructions:** Guess the words defined by the cryptic clues (words vary in length from three to eight letters, and three of them are capitalized), then enter them in the grid one after another in the same order as their clues, starting in the upper left corner. Across words that don't end at the right continue on the next row, and down words that don't end at the bottom continue in the next column. Eight across words and eight down words won't fit in the grid unless one of their letters is removed. Those sixteen letters, taken in order, spell a three-word phrase related to another word hidden in the correctly completed grid. (Thanks to Kevin Wald '93 for test-solving and editing this puzzle.)
