## Puzzle #87 — August 2008 "Hell's Angels"

**Instructions:** Guess the words defined by the cryptic clues (words vary in length from four to nine letters; seven are capitalized and one is foreign), then enter them in the grid one after another in the same order as their clues, starting in the upper left corner. Across words that don't end at the right continue on the next row, and down words that don't end at the bottom continue in the next column. Six across words and six down words won't fit in the grid unless one of their letters is removed. Those twelve letters, taken in order, spell a two-word phrase related to the mystery entries. Thanks to Kevin Wald for test-solving and editing the puzzle.
