Puzzle #93 – February 2009 "Eastern Seaboard"

Instructions: Guess the words defined by the cryptic clues (words vary in length from three to ten letters, and six of them are capitalized) then enter them in the grid one after another in the same order as their clues, starting in the upper left corner. Across words that don't end at the right continue on the next row, and down words that don't end at the bottom continue in the next column. Seven across words and seven down words won't fit in the grid unless a sequence of two letters they contain is removed. The meaning of those fourteen sequences is suggested by the puzzle's title. Thanks to Kevin Wald for testsolving and editing this puzzle.
