

## Guest Puzzle #9 – January 2008 "Numbers" (by Arthur Schless)

**Instructions:** Guess the words defined by the cryptic clues (words vary in length from three to eleven letters and include one capitalized word), then enter them in the grid one after another in the same order as their clues, starting in the upper left corner. Across words that don't end at the right continue on the next row, and down words that don't end at the bottom continue in the next column. Eight across words and nine down words won't fit in the grid unless one of their letters is removed. Those seventeen letters, taken in order, spell a two-word phrase describing an eleven-digit number. The number is to be entered in the dashes beneath the grid. The digits of that number, taken in conjunction with the row numbers to the left of the grid, mark the positions of letters in the grid that spell a word appropriate to the puzzle's title.
